STRONG FIRMING CREAM

Boosted with Kigeline®

Instant Firming Effect

Preservative Free, Silicone Free, Paraffin and Petrolatum Free

Nickel Tested - Cruelty Free

Rebel Professional Skin Care is a Cosmeceutical Line, result of cutting edge research led by a team of cosmetologists and dermatologists, to provide more performing and safer cosmetic tools. Rebel Professional Skin Care Line includes only Nickel Tested cosmetics compounds to Prevent both allergic reactions for those already sensitive to Nickel, but also the sensitization for those who are not allergic to it.

INDICATIONS

Fix Cream-H New Formula is an even richer cosmetic, indicated for the treatment of relaxed tissues, saggy, lacking tone and elasticity. Thanks to a complex of effective natural actives, Fix Cream-H Strong stimulates the microcirculation, performing at the same time an intensive firming and elasticizing action on the overly relaxed tissues, guaranteeing longer lasting results; it nourishes the epidermis with natural vegetable oils, and provides an effective anti-radical and anti aging action at the same time.

FEATURES AND PROPERTIES

Kigeline® complex is a mix of natural actives which selectively targets the relaxed tissues, promoting a firming action. Centella Asiatica effectively stimulates the drainage of liquids and the consequent oedema, which is the source of the cellular evolution. Caffeine is vaso-tonic and inhibits the phosphodiesterase by increasing the consumption of fatty acids. Unsaponifiable of Olive is a noble fraction of the olive oil, rich in highly skin-friendly and oil-restitutive components. Thanks to the presence of a complex molecule with well known elasticizing properties (Squalane), the unsaponifiable of Olive performs an effective action against skin laxity. Sweet Almond Oil, together with Wheat Germ Oil with re-known elasticizing properties, nourishing and antioxidant, help by keeping the skin toned and protected. Sweet Clover extract, rich in flavonoids and tannins, together with Escin, perform an effective action against water retention. Vitamin A promotes the tissue regeneration and Lyco cerasome counteracts the free radicals.

HOW TO USE: Shake well before use. Use the product at least twice a day on the area to be treated, following with a comforting massage to help its complete absorption. A pleasant feeling of freshness will follow the product application.

ADVISORY NOTICE

Avoid grazes, wounds, red and sensitive areas, eczema, external mucosa, face, eyes, ears, groin, armpits, and perianal area. Store in a cool and dry place, away from heat and direct sunlight, below 25°C. Close the box after use and store in its original package. External use only. Keep away from the reach of children. The manufacturer/distributor declines any responsibilities for use of this product outside of the one outlined in the How To Use section.
